# SPARFELL LANDS IN MALTA!

## The aviation group obtains its 4th AOC

**B**uilding on its growth of the past couple of years and strengthening its positioning in Europe, SPARFELL announces its fourth AOC in Malta.

Responding to specific needs expressed by clients, the Maltese AOC offers customers interested in SPARFELL's services and having or wanting to have a Maltese aircraft registration an alternative to registrations from its existing AOCs in Austria, San Marino, and France. Specifically, the services provided are aircraft management and aircraft charter.

### **SPARFELL España S.L.**

With appointed Managing Director Ms. Rocío Masip, SPARFELL has also created a Spanish subsidiary located in Madrid - SPARFELL España S.L. - continuing the same positive trajectory. Similarly to SPARFELL Malta Ltd, the subsidiary will provide aircraft management and aircraft charter services to Spanish customers who value local service and expertise from a global company.

### **SPARFELL's Fleet Expansion**

SPARFELL's geographical growth further fostered fleet expansion, with the aviation group now counting 35 aircraft from varying manufacturers under management across its four AOCs. The latest aircraft to join the fleet are two Falcon 7X, a Global 7500, a Learjet 60, a Learjet 60XR and a Gulfstream 280.

### **SPARFELL Aircraft Trading**

The SPARFELL Aircraft Trading locations in Geneva, Washington DC, Vienna, and Singapore have had a busy 2022 so far, reacting to the dynamic market forces currently affecting worldwide aircraft trading. As a result, the Trading group has had its best year ever, and expects to close a few more currently pending sales by year end.

Brandt Boyle, Vice President of Aircraft Trading, says, "I am particularly proud to see the cooperation between our European and US locations, which has resulted in the sale of several aircraft from Europe into the United States, including a Legacy 600, Legacy 450 and Citation Ultra. This certainly confirms that the plan to help SPARFELL expand into

the US Market has been an initial success, with more exciting opportunities on the horizon."

The SPARFELL Trading group aims to serve the trading requirements and interests of current SPARFELL management clients but also interacts closely with clients not yet affiliated with SPARFELL by maintaining a connection with the Market via other brokers and contacts worldwide, seeking to engage in mutually beneficial partnerships that result in real-time Market knowledge and successful aircraft transactions.
